ABSTRACT

Targeting the usability and stability of digital assets, SRIVERSE is entirely a blockchain-based innovative economic system, focusing on utility of tangible **cryptomoneretary assets**. SRIVERSE establishes a global network of affiliated brands, encompassing worldwide discounts, coin-based trading, e-commerce, mobile payments, crypto exchange, decentralized apps, awareness programs and commercial projects.

SRIVERSE network, focusing on integration of the credible cryptomoneretary assets fostering global prolific usability.

SRIVERSE has heavily invested into innovative research in blockchain technology and has developed their foundations on Federated Byzantine Agreements (FBA) based Blockchain. This foundation ensures complete security whilst providing fast, reliable and efficient mechanism for multidomain transactions. SRIVERSE proliferates assets-based investment programs to foster worldwide real-time usability with fool-proof security in the aftermath of crypto-catastrophes. SRIVERSE makes CRYPTO accessible, secure and usable. Global ecosystem of SRIVERSE projects are testimony to the vision.

BUSINESS STRATEGY

Commercial Projects

Investing in diversified high yield projects to potentiate usability, scalability and mass-scale globally prolific usability within the business ecosystem

Interoperability

SRIVERSE regulated & IBANized Crypto Exchange focuses fractional purchasing, 24x7 trading, instant settling, crypto ledger, crypto-registry and POS clearing

Adoption

Rewarding early adopters activates faster crypto adoption, allowing fresh enthusiasts to enter crypto-cosmos alongside sophisticated investors

Scaling

Upscaling crypto-economy is proportionate to upskilling youth. SRIVERSE aims to educate publics on break-free financial freedom via decentralized finance (deFi)

TECHNOLOGY LANDSCAPE

SRI TOKEN is created through Federated Byzantine Agreements on Polygon Blockchain, supporting high-speed transactions throughputs and allowing authorized members through a formal KYC process. FBA is the first provably safe consensus mechanism to enjoy four key properties simultaneously

Polygon is designed to be high-performance blockchain that can handle large number of transactions per second. Plasma, a Layer 2 scaling solution allows efficient transactions with low latency and highest possible security enabling flexible trust among SMART consensus protocols

DECENTRALIZED GOVERNANCE:

Anyone is able to participate, and no central authority dictates whose approval is required for consensus

FLEXIBLE TRUST:

Users have the freedom to trust any combination of parties they see fit. A small non-profit may play a key role in keeping much larger institutions honest.

LOW LATENCY:

There is no calculation of puzzles like POW or POS. Nodes can reach consensus in 3-5 seconds.

ASYMPTOTIC SECURITY:

Safety rests on digital signatures and hash families whose parameters can realistically be tuned to protect against adversaries with unimaginably vast computing power.

EXCEPTIONAL ECONOMIC VALUE

CRYPTO EXCHANGE

SRI Exchange focuses ease of use and prolific usability of cryptomoneretary assets

USABILITY PROJECTS

CRYPTOMONETARY MARKET VISUALIZATION

SRIVERSE

CRYPTOMONETARY SCALABILITY

CRYPTOCURRENCY BY VOLUME

Predicted as the next emerging technology; the value of cryptocurrencies is growing exponentially:

According to the industry website Coin Market Cap, the current market cap of all cryptocurrencies fluctuates at approximately \$3080 billion. Despite the correction, the market remains stable, with no predictions of a future drop before 2025. On the contrary, influential names in the market predict the opposite, with crypto geeks and industry experts predicting the market to reach the **\$11 trillion mark by 2025**

Three Trillion Dollars Worth of Crypto

Market caps of crypto currencies (in billion U.S. dollars)

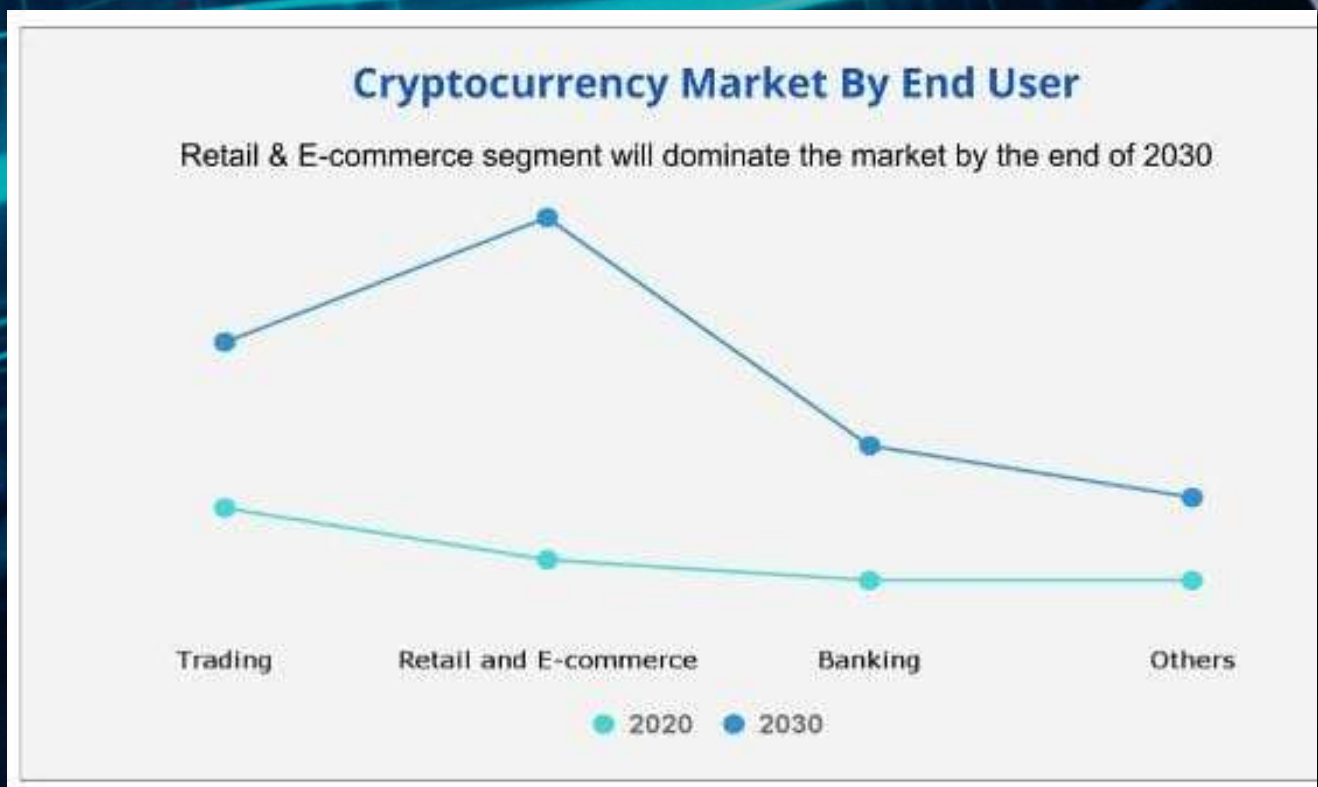

SCALABILITY BY SEGMENT

Retail & e-Commerce

Mass adoption of crypto assets is driven by the exponential scalability potential exhibited by the retail trade and e-Commerce industry.

Futuristic technologies such as web 3.0, metaverse, robotic automations, d'Apps and DAOs are expected to dominate the adoption curve by 2025, however, the POS level transactions and IBANIZATION of the digital wallets shall usher cognitive era in mass scale cryptomonetary adoption scalable to infinity.

CRYPTO ADOPTION

GROWTH OF CRYPTO CUSTODY

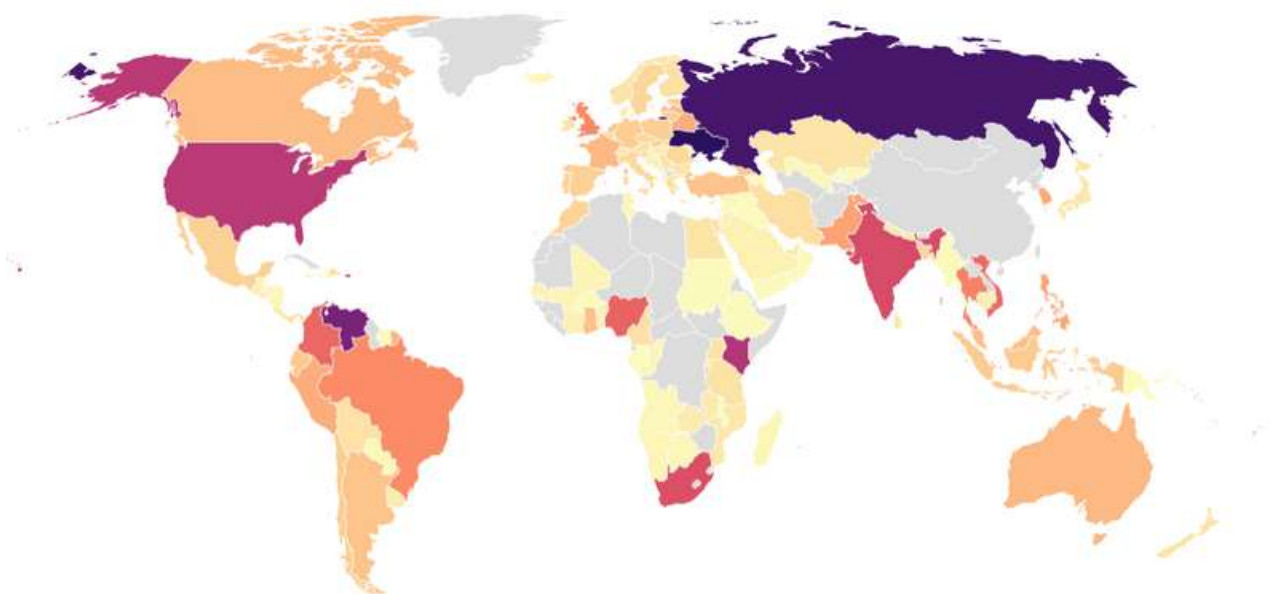

The growth rate of blockchain far exceeds that of any previous tech innovation. Measured by users and the mass adoption curve, crypto investing has been growing exponentially despite regulatory challenges and lack of interoperability among credible cryptomoneretary assets

Crypto-custody is growing exponentially in three different directions -- volume, transaction speed, and software sophistication -- making it the fastest growing asset in human custody

MARKET GROWTH

Cryptomoneretary market size to grow upto 11 Trillion by 2025

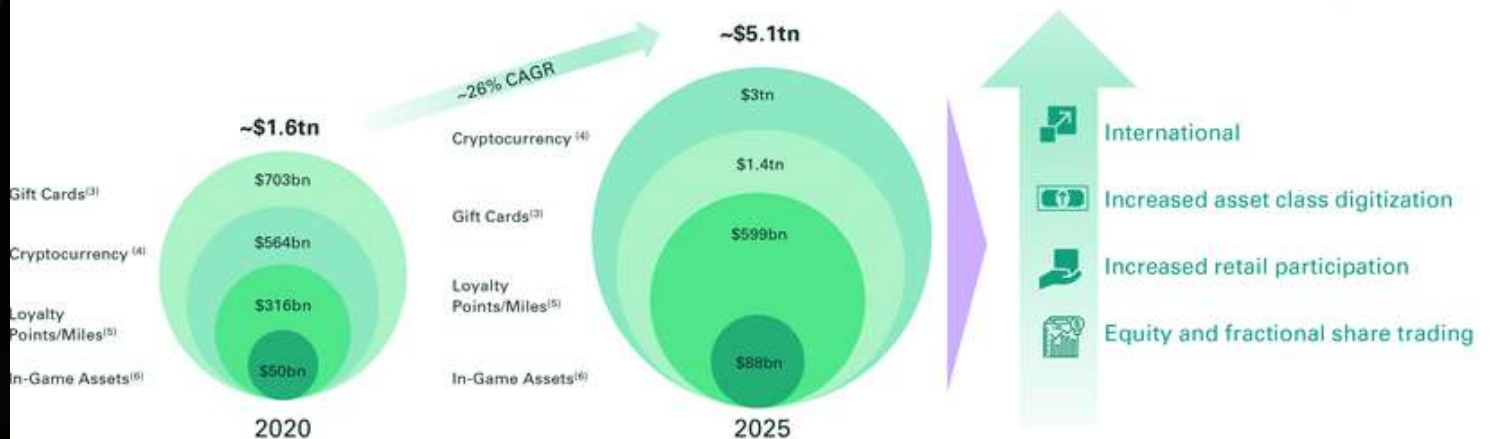

The cumulative worth of the loyalties and affiliate market has improved swiftly in last few years, as highlighted in a report from “Markets and Markets” which predicts that the brands and loyalty management market grew at a compound annual growth rate (CAGR) of 22.2% by 2021 and is expected to grow at CAGR of 26% to reach \$5.1 trillion by 2025.

Digitalization, tokenization of assets, retail trade and fractional ownership (deFi) shall dominate the market by 2025.

REGULATORY ENVIRONMENT

Virtual Assets Regulations

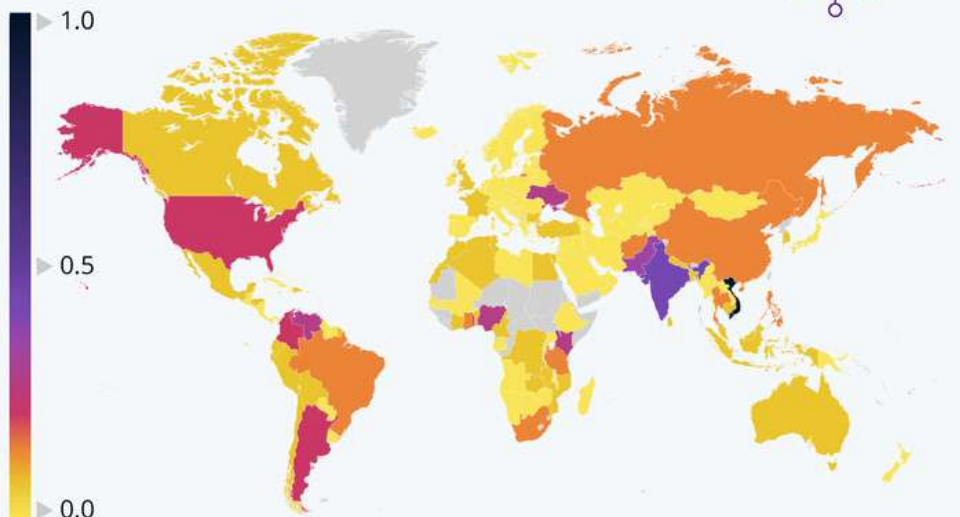

Regulatory landscape surrounding cryptocurrencies adds uncertainty and inhibits mainstream adoption. Businesses and individuals often struggle to navigate complex regulations and compliance requirements

United Arab Emirates (UAE) has one of the most favorable regulations regarding blockchain technology, metaverse, crypto trading and cryptomonetary asset management including tokenization of assets. DMCC crypto center, DIFC, ADGM and SRTIP offer appropriately regulated environments for the crypto enthusiast investors, traders and freshers, alike. VARA (virtual assets regulatory authority) works closely with the private sector while issuing industry savvy growth oriented regulations.

SRI Token strives to meet regulatory requirements within the VARA compliance framework. SRI token aims to foster trust and bridge the gap between traditional financial systems and the cryptomonetary asset management.

MARKET PROSPECTS

COMMUNITY DEVELOPMENT

SRIVERSE is all about community. DeFi has the ability to enhance user's trust leading to mass scale cryptomonetary adoption and global proliferation of usability. SRIVERSE network structure nurtures new membership and promotes an interdependent and integrated ecosystem of commercial activities. SRI Token is created on a decentralized blockchain that enables secure and transparent transactions of fiscal value. It operates on a peer-to-peer network, eliminating the need for intermediaries. With SRI Token, users can engage in activities like trading, staking, and accessing decentralized applications.

INFLUENCER MARKETING

Influencer marketing, as increasingly practiced in a commercial context, comprises four main activities:

1. Identifying influencers, and ranking them in order of importance
2. Marketing *to* influencers, to increase awareness on crypto enabled gaming
3. Marketing *through* influencers to increase market awareness
4. Marketing *with* influencers, turning influencers into advocates of SRI Token

VISION & INVESTMENT STRATEGY

SRIVERSE

VISION

We at SRIVERSE strive to achieve our long-term vision by virtue of celestial community development initiatives and the key objectives of the SRI Token emphasize our focus on enhancing interoperability, scalability, stability, security, regulatory compliance, and decentralized community based strategic governance. These objectives lay stronger and deeper foundations for the unique value proposition and enormous benefits that the SRI Token aspires to deliver to the global crypto community thru our #global prolific usability

Investment Strategy

Commercially viable investment policy of SRIVERSE can only be achieved through balanced portfolio and diversification both in terms of jurisdictions and asset classes. SRIVERSE investments are characterized by our galactic interstellar approach as we keep revisiting the configuration of our investment strategy perpetually:

- Multiple Asset Classes – not putting all our eggs in one basket
- Various Locations and Jurisdictions – truly multiregulated operations with 100% secure LEGAL cover
- Research oriented Futurism – diving into the future to monetize the future
- Pragmatic Risk Exposure – cryptobots for data analytical intelligent risk management
- Flexible Exit Opportunities – buying nodes, trading crypto and smoothly exiting was never that easy
- Algorithmic Excellence – artificial intelligence for hypervigilant risk aversion in crypto assets
- Incentivized Diversification – multijurisdictional diversification and multiple projects across the globe

GLOBAL **PROLIFIC** USABILITY

Cloud capital, fractional equity syndication, digital wealth management & crowdfunding are transforming the global economy, creating wide arrays of opportunities for the entrepreneurs, NewCos and startups thus stimulating economic growth globally.

It indicates that the emerging markets of the Middle East, Africa, Europe, South America and BRI countries are ripe with opportunities for motivated & sophisticated investors as well as for the enthusiastic entrepreneurs. Amazingly, large scale capital investments into MSME are expected to exhibit lower than ever CAGR globally over the next few years.

The present global situation has encouraged many institutions to offer “incentivized” financial products, especially in the ESG space. Post COVID scenario calls for “prospective adaptability” complimented by high impact social inclusion to benefit from acuteness of demand in the digital assets space, such as fractional equity FinTech.

Here, the most astounding research towards “inclusive nanoeconomics” is believed to attract the retail investors with inimitable and irresistible offerings and nano-smart investment products. The concept of worldwide network adds value through a social inclusion model that ensures business success within minimal market penetration time.

It helps establish feet on the ground while steering through the critical time scenario (CTS). The CTS is thus looking for tangible risk alternatives to prevent fresh, retail and sophisticated investors from sensitivity of the perceivable risk inside spheres of the contemporary corporate world. Nanoscale Cloud Investing is thus need of the hour.

At **SRIVERSE**, the most modern research benefits people & organizations with inimitable and authentic solutions to scale amid evolving glitches and uncertainties. **SRIVERSE** community benefits from the cutting-edge research instituted by world’s most respected Centers of Excellence on Futurism & Innovation like USA based **WePelicans Prospective**.

The concept of digitally integrated cloud banking adds value through pragmatically implemented UX models that simply ensure business success with capital preservation thru a spectrum of multifaceted MIS integrated to the **SRIVERSE** proliferating commercial ecosystem.
